

How to choose your perfect Arctic Spa

Some steps to **consider**
to **invest in yourself and**
the happiness of your family

1

Ask yourself
these questions

How many people do you expect to enjoy your Arctic Spa? Think Family and Friends.

Do you have any size restrictions for where you plan to install your Arctic Spas Tub?

Would you like a lounger or not in your Arctic Spa?

In asking and answering yourself the questions above, will help determine what Arctic Spas® Models to consider.

2

What is important to you to make Hot Tubbing Easy?

Energy Efficiency

FreeHeat Insulation System - The investment in constructing a self-supporting shell allows Arctic® to insulate differently than the industry standard designed after home construction. We insulate the exterior walls, floor and cover, so ambient heat from the pump penetrates the shell and heats the water. This technology offers energy efficiency resulting in lower running costs and real freeze protection.

Easy Maintenance

SPA BOY® - Exclusive to Arctic Spas®, an automated saltwater system that helps monitor and adjusts your water to maintain ideal spa water conditions. And can be all monitored and coordinated with your smartphone or computer.

Onzen™ - The Onzen (TM) Salt Water system is proprietary to Arctic Spas® that produces sanitizer from the Dead Sea salts. This significantly reduces the effort required to maintain clear and safe spa water conditions reducing the cost of adding chemicals. Salt Water is excellent for your skin.

OnSpa® - It allows you to monitor and control your tub anywhere in the world using the Arctic Spas® App on your phone or via the myarcticspa.com web portal in real-time.

Longevity

Forever Floor® - This floor is impervious to moisture, pests and time. All you need is a level surface with no site prep required making installation easy.

Mylovac™ Cover - The world's finest cover technologically constructed to keep moisture out of your cover inserts. This cover also keeps your tub's heat in reducing your running costs and are built to last!

Cabinet - Our Red Wood Cedar Cabinets and No Maintenance Cabinets are built to last!

Therapy

SDS - This unique design will give you the ultimate massage. 7" bearing less pulsating massage jets with a dedicated high flow pump will ease your tension, leaving you refreshed.

YESS Oxygen Skin Therapy - This system saturates the water with millions of microscopic oxygen bubbles that enter your pores and draw out the impurities that stimulate skin health and regeneration. This system leaves your skin feeling soft, smooth and silky!
